CONFIDENTIAL

16 May 1957

MEMORANDUM FOR: Chief, SE/LOG
Chief, FE/LOG
Chief, SE/LOG
Chief, WE/LOG
Chief, WE/LOG

SUBJECT: Air Conditioners, Criteria for Obtaining

REFERENCE: Delegation of Authority for Field Procurement of Air Conditioners from the Director of Logistics, dated 24 April 1957

1. Attached is a paper prepared by [REDACTED] giving a list of foreign cities with dry-bulb, wet-bulb, and effective temperature data that they are using to indicate whether or not air conditioning might be required at the various stations. You will note that all cities with an effective temperature above 84 F.T. are listed for air conditioning. This is in accordance with the practice of the Public Buildings Service for Government Buildings. For your information, effective temperature is determined from a chart devised by the American Society of Heating and Air-Conditioning Engineers and is not a multiple of the dry-bulb and wet-bulb temperatures.

25X1C

25X1C4a

3. It is hoped that the above data will assist you in making decisions for field use of air conditioners.
